Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am 	<i>Describe customer with 3-4 key characteristics - who are they?</i>	I am a health-conscious individual (student/professional/fitness enthusiast) who wants to maintain a healthy lifestyle. I care about my diet, fitness and overall well-being. I may or may not have prior nutrition knowledge, but I want guidance that is personalized and easy to follow.
I'm trying to 	<i>List their outcome or "job" the care about - what are they trying to achieve?</i>	I'm trying to eat healthy, get personalized meal plans, track my daily nutrition intake, achieve my health goals (like weight loss, weight gain or maintenance) and improve my eating habits with the support of a dietitian.
but 	<i>Describe what problems or barriers stand in the way - what bothers them most?</i>	But I face challenges such as lack of personalized diet plans , difficulty in tracking daily nutrition, not knowing the right portion sizes, busy schedule, inconsistent eating habits and limited access to professional dietitian guidance.
because 	<i>Enter the "root cause" of why the problem or barrier exists - what needs to be solved?</i>	Because existing solutions are either generic, not easy to use, or not connected with dietitians . There is no simple platform that provides personalized meal planning, nutrition tracking, progress monitoring and dietitian support in one place.
which makes me feel 	<i>Describe the emotions from the customer's point of view - how does it impact them emotionally?</i>	Which makes me feel frustrated, confused and unmotivated . I feel guilty when I can't follow a diet plan, worried about my health goals and overwhelmed when I don't see progress. It affects my confidence and consistency in maintaining a healthy lifestyle.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A health-conscious individual who wants to maintain a healthy lifestyle.	Follow a balanced diet, track my nutrition, and receive personalized meal recommendations.	I find it difficult to calculate nutritional values and create suitable meal plans on my own.	Reliable nutrition information is scattered across different sources, and most applications do not provide personalized guidance.	Confused, frustrated, and unable to consistently maintain healthy eating habits.
PS-2	A dietitian who manages multiple clients with different nutritional requirements.	Create personalized meal plans and monitor each client's nutrition progress efficiently.	Managing client records, meal plans, and progress manually takes a lot of time and effort.	There is no centralized platform that securely stores client information and nutrition data.	Overloaded, less productive, and unable to provide timely personalized support to all clients.
